This town was laid off and located in February last, on a tract of land densely timbered, easy of access from the surrounding country and situated favorably for health: already there are a number of houses going up. The Missouri river at this point is compressed within a narrow space, the channel is remarkably deep on the Delaware side, and washes for a mile above and below, the Kansas shore, thus affording at all times a safe and secure landing for steamers.

This bottom is of itself sufficient to sustain a town of large size. This is the most accessible point from which the Delaware nation of Indians can procure their supplies. Delaware is the nearest and most accessible point at which the country on the Konsas river can do their receiving and forwarding business. There are a great num-ber of towns on the Kansas that will find it to their interest to make this place their shipping point, among them we would name Osawkee, Calhoun and others. As there is a good ferry Calhom and others. As there is a good ferry at this point, emigrants traveling to Kansas Territory on the great State road from St. Joseph to St. Louis, will find that this is the proper point at which to enter the territory, as by this means they avoid a great deal of unnecessary travel.

MISSOURI Atchison Ferry!!

L. BURNES, BRO G. M. MILLION.

THIS FERRY has been in successful operation since 1849; during which time it has been the great crossing point for the Oregon, California and Utah Emigrant who came by Hanibal and Palmyra; there being a State Road directly through, and the latitude precisely the same. Our beat is a good one, and we have plenty of hands engaged at all times, to work it.

At the opening of Spring we shall have a fine new

when all can cross without detention. The ferry landing is the best on the River, there be-ing at all times deep water from shore to shore, and very narrow. Our banks have no wide sand beach where stock can mire down, being

dry at all times.

To the Engrant to Kansas we say, this is the place to cross, as when here the distance to other points in the Territory, is nearer than from crossing places above or below.
